Exercises

EXERCISE 1

Write out the process of how to "brush your teeth". This may take 4-10 minutes if you do a good job.

Then, meet with your group to go over the write-ups. Tweak the write-ups as needed.

Your team will "present" a "brush your teeth" process to the class as a whole. Your team can select one of the team member's to advance or can blend them together using steps from each team member.
