# Exercises: "Program the Monkey" - Part 2
In these exercises, you need to "program your monkey" to put the banana in the basket.   Like before, when you finish, talk it over in your group to see how others programmed their monkey.

EXERCISE 1

EXERCISE 2

EXERCISE 3

Would your answer change if you knew that the goal was to take the smallest number of steps possible?

The goal here is: *the banana ends up in the basket*. It doesn't say where the basket has to be. Do you pick up the banana and carry it to the basket? Do you take the basket over near the banana?
